Volume 19 (2009)

Proceedings of the
Second International DisCoTec Workshop on
Context-Aware Adaptation Mechanisms for
Pervasive and Ubiquitous Services
(CAMPUS 2009)

Guest Editors: Romain Rouvoy, Michael Wagner
Managing Editors: Tiziana Margaria, Julia Padberg, Gabriele Taentzer

Preface

There is a huge market potential for mobile applications in Europe today. Most people already carry a mobile device of some sort wherever they go, and an increasingly diverse set of devices (PDAs, smart phones, GPS, etc.) are becoming widely available. Recently, service-orientations (*e.g.*, OSGi, SCA) have evolved to address these highly dynamic environments. However, it is still technically difficult, using existing method and tool supports, to create such services-oriented applications. For example, the very large range of devices, types of infrastructure, ways in which it can change, situations in which users can find themselves, and the functions they want, introduce great complexity and pose considerable technical challenges. To overcome these difficulties, and promote the development and widespread deployment of innovative mobile applications, more and more projects are addressing the development of context-aware adaptation mechanisms for leveraging the development of mobile applications. These projects aim at providing simple but powerful integrated approaches to support the development of applications interacting in pervasive and ubiquitous environments. Thus, the CAMPUS workshop will focus on the promising approaches in the domain of context aware adaptation mechanisms supporting the dynamic evolution of the execution context (*e.g.*, network/device/service failures).

This volume contains the proceedings of the second workshop on Context-aware Adaptation Mechanisms for Pervasive and Ubiquitous Services, held in Lisbon, Portugal, June 12, 2009. The CAMPUS workshop is jointly organized by the MUSIC and DiVA IST projects. It provides a forum for scientists and engineers in academia and industry to present and discuss their latest research. The focus of the conference is the design, implementation, deployment, and evaluation of adaptive platforms and architectures for context-aware environments. This year, we had 9 submissions from 8 different countries, among which the top 7 technical papers were selected for inclusion in the technical program of the workshop. All papers were evaluated by at least three reviewers with respect to their originality, technical merit, presentation quality, and relevance to the workshop themes. The selected papers present the latest results and breakthroughs on middleware research in areas of automotive systems, ubiquitous environments, pervasive environments, ambient computing and multimedia computing. We would like to express our deepest appreciation to the authors of the submitted papers, to all Program Committee members for their diligence in the paper review and selection process, and to all external reviewers for their help in evaluating submissions.

Organization

Steering Committee

Frank Eliassen	University of Oslo, Norway
Kurt Geihs	University of Kassel, Germany
Svein Hallsteinsen	SINTEF ICT, Norway
Geir Horn	SINTEF ICT, Norway
Valérie Issarny	INRIA, France

Organizing Committee

Program chair

Romain Rouvoy University of Lille 1, France & University of Oslo, Norway

Publication chair

Michael Wagner University of Kassel, Germany

Program Committee

Olivier Barais	University de Rennes 1, France
Benoit Baudry	INRIA, France
Yolande Berbers	K.U.Leuven, Belgium
Gordon Blair	Lancaster University, UK
Licia Capra	University College of London, UK
Ruzanna Chitchyan	Lancaster University, UK
Denis Conan	Institut TELECOM, SudParis, France
Geoff Coulson	Lancaster University, UK
Schahram Dustdar	Vienna University of Technology, Austria
Frank Eliassen	University of Oslo, Norway
Kurt Geihs	University of Kassel, Germany
Svein Hallsteinsen	SINTEF ICT, Norway
Geir Horn	SINTEF ICT, Norway
Joseph Loyall	BBN Technologies, Massachusetts
René Meier	Trinity College Dublin, Ireland
Nearchos Paspallis	University of Cyprus, Cyprus
Roland Reichle	University of Kassel, Germany
Romain Rouvoy	University of Lille 1, France & University of Oslo, Norway
Ulrich Scholz	European Media Laboratory GmbH, Germany
Lionel Seinturier	University of Lille 1, France
Sotirios Terzis	University of Strathclyde, UK
Michael Wagner	University of Kassel, Germany

External Referees

Christoph Evers	University of Kassel, Germany
Lukasz Jusczyk	Vienna University of Technology, Austria

Contents

Language Abstractions for RFID Technology <i>Andoni Lombide Carreton, Kevin Pinte and Wolfgang De Meuter</i>	5
TOTAM: Scoped Tuples for the Ambient <i>Christophe Scholliers, Elisa Gonzalez Boix and Wolfgang De Meuter</i>	19
VOLARE: Adaptive Web Service Discovery Middleware for Mobile Systems <i>Panagiotis Papakos, David Rosenblum, Arun Mukhija and Licia Capra</i>	35
An Architecture to Support Adaptation of Persistent Queries in Mobile Environments <i>Jamie Payton, Richard Souvenir and Dingxiang Liu</i>	41
Context-Aware Adaptation in DySCAS <i>Richard Anthony, DeJiu Chen, Mariusz Pelc, Magnus Persson and Martin Törngren</i>	47
Context- Aware Service Selection with Uncertain Context Information <i>Yves Vanrompay, Manuele Kirsch Pinheiro and Yolande Berbers</i>	63
An Adaptation Reasoning Approach for Large Scale Component-based Applications <i>Mohammad Ullah Khan, Roland Reichle, Michael Wagner, Kurt Geihs, Ulrich Scholz, Constantinos Kakousis and George Papadopoulos</i>	75
